DETAILED ACTION

Allowance

Claims 1-4, 6-7, 11-13, 15-19, 21-22, 26-28 and 30 are allowed.

1. The following is an examiner's statement of reasons for allowance:

Regarding **claims 1 and 16**, the prior art of record fails to suggest or disclose converting the destination telephone number including matching the mapping rule and at least a portion of the destination telephone number in a second format based on a prescribed pattern within the destination telephone number in the second format. It is not obvious to modify Foster adding the converting step described above because the destination telephone number of Foster is mapped to an appropriated network number for the local number portability service.

Regarding **claims 12 and 27**, the prior art of record fails to suggest or disclose converting the dial map is configured for storing a plurality of the mapping rules, each mapping rule specifying a corresponding first expression, and a corresponding second expression having the first format, the dial map selects the mapping rule based on a match between the destination telephone number having the second format and the corresponding first expression. It is not obvious to modify Foster adding the configuration of the dial map to select a mapping rule as described above because the destination telephone number of Foster is mapped to one mapping rule in the service control point for the local number portability service.
